Dr. Robert Bailey

Senior Software Engineer

Tweeter

1756 Northlake Dr.

Columbia, SC 29201

Dear Dr. Bailey,

I not only believe that this job is a perfect fit for me, but that I am a perfect fit for this job. I am applying for a Junior Software Engineer position at Tweeter after hearing about the great work environment. I spoke with a friend, John Stephens, a current Software Developer at Tweeter, where he told me about your great management. Having experience with bad management, his recommendation piqued my interest and I applied for the job. I know this job is a great opportunity for me to grow and challenge myself, while working under some great people in the industry.

I am the right fit for the job because of my programming experience. I graduated from the University of South Carolina with a degree in Computer Science and worked for YooToob for four years. In my time there, I gained hands-on experience with back-end development, and worked with a small team of other Software Developers daily. I worked great in this group, as I have good people skills and an ability for leadership. I fostered this ability in my decade with the Boy Scouts of America, where I led dozens of scouts through camping trips, weekly meetings, and community service. During my time with the BSA, I received the honor of reaching the rank of Eagle Scout. However, the greatest thing that I took from my time there was an understanding of leadership and working with others.

With my academic and professional background, I know that I am a great fit for this position. I look forward to utilizing my abilities as a part of Tweeter. Thank you for your time and consideration.

Sincerely,

Noah Ackermann
